

Cellular System Performance Dashboard

Sample data — illustrative only

Selected cell / site

C01 / Campus North

Network type (LTE / 5G)

LTE

Reporting period

08 Oct 2026 • 10:00–11:00

Selected cell: C01

Period averages; rates calculated over the period

Signal strength · RSRP

−88 dBm

Good · target ≥ −95 dBm

Signal quality · SINR

22 dB

Good · target ≥ 15 dB

Throughput · downlink / uplink

84 / 24 Mbps

Good · targets ≥ 50 / ≥ 10 Mbps

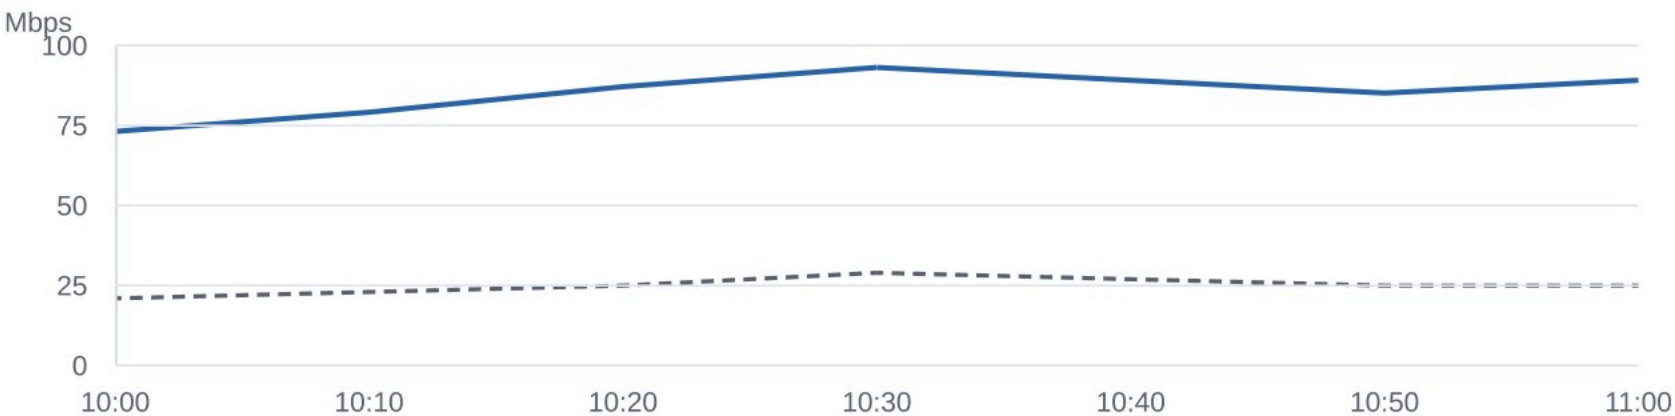

Latency · round-trip time

28 ms

Good · target ≤ 40 ms

Throughput over time

C01 · LTE · 08 Oct 2026 · 10-minute samples

Sample mean: downlink 84 Mbps; uplink 24 Mbps. Time shown in local hours.

Assignment targets & status · C01

Illustrative targets for this assignment only

Criterion	Sample	Target	Status
Call setup success	99.2%	≥ 99%	Good
Dropped-call rate	0.6%	≤ 1%	Good
Handover success	98.5%	≥ 98%	Good
Network availability	99.95%	≥ 99.9%	Good
Utilization / load	68%	≤ 80%	Good

Good = meets target; Warning = outside target.

Per-cell performance · LTE

Same reporting period • Warning = one or more assignment targets missed

Cell / site	RSRP (dBm)	SINR (dB)	Downlink (Mbps)	Uplink (Mbps)	Latency (ms)	Call setup success (%)	Dropped calls (%)	Handover success (%)	Availability (%)	Load (%)	Overall status
C01 · Campus North	−88	22	84	24	28	99.2	0.6	98.5	99.95	68	Good · selected
C02 · Campus West	−92	18	76	21	34	99.0	0.8	98.2	99.92	74	Good
C03 · Campus East	−101	9	38	8	52	97.8	1.8	96.5	99.70	87	Warning
C04 · Campus South	−90	20	80	22	31	99.1	0.7	98.3	99.93	82	Warning · load

Static networking assignment prototype • All values are fictional; targets are for this assignment only, not universal industry standards.
